

noba[®] SCIENCE

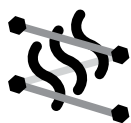

NOBA[®] SCIENCE: SCIENCE MEETS CAT HYGIENE.

Introducing the most advanced cat litter in our lineup. Noba[®] Science is scientifically formulated to eliminate strong, foul odours in the litter box. Made of pure sodium bentonite, it retains all of the advantages related to its mineral composition (ultra-efficient clumping, fast absorption) while offering unparalleled odour-suppression.

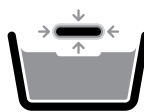

- Contains probiotics that are distributed evenly thanks to our active technology.
- Moisture from urine and feces activates the probiotics, stopping the biochemical process that leads to creation of ammonia, which is responsible for strong, foul litter box odours.
- By replacing soiled litter with fresh product during maintenance, active technology is maintained, enabling a sustainable, fresh and odour free litter box environment.
- Strong, foul odours are neutralized at their source.
- Low tracking; Noba® Science helps you keep your house clean.
- Probiotics promote quick dehydration of feces, leading to easy maintenance and less wasted litter. Go up to 3 months between litter box maintenances.
- Low dust formula, ideal for people and pets with respiratory issues.

LOW DUST FORMULA

SCIENTIFICALLY FORMULATED TO LIMIT BACTERIA GROWTH AND ODOURS.

PRODUCES SUPER FLAT, SUPER COMPACT CLUMPS, HELPING YOU CUT DOWN ON LITTER USE AND MAINTENANCE LIKE NEVER BEFORE.

MADE FROM PURE, HIGHEST-QUALITY SODIUM BENTONITE FOR MAXIMUM EFFICIENCY.

Made in Canada.
